

POLICY No. 6-25

NET METERING AVOIDED COST RATE SCHEDULE

PURPOSE OF POLICY:

To define the avoided cost generation value for net metered installations.

POLICY CONTENT:

Applicability of Net Metering Avoided Cost Rate Schedule

The net metering avoided cost rate schedule applies to all net metered services established after the earlier of either June 30, 2029 or the first date upon which the cumulative generating capacity of net metering systems equals four percent of the utility's peak demand during 1996.

Net metered installations established prior to the net metering avoided cost rate effective date as defined above will be credited at the kWh rate contained in Policy 6-4.

Once effective, the net metering avoided cost will be updated per the avoided cost schedule calculated with the biennial Conservation Potential Assessment in the procedure developed by the CEO.

2019 Net Metering Avoided Cost Rate:

kWh Credit for installations after policy effective date: **\$0.0285** per kWh
kWh Credit for installations prior to policy effective date: kWh rate in Policy 6-4

RESPONSIBILITY FOR IMPLEMENTATION:

The CEO is responsible for developing procedures to bill qualifying customers under this rate schedule.

POLICY APPROVAL DATE 06/20/19

POLICY EFFECTIVE DATE 06/20/19

Brian Slaybaugh, President
Board of Trustees
