

August 17, 2023

Dear Valued Contractor,

The purpose of this letter is to inform your organization that the Performance Tested Comfort System (PTCS) program with Bonneville Power Association (BPA) will no longer be available after the current BPA rate period ends. The last day to submit a PTCS application to Inland Power is **August 31, 2023**. For contractors who submit PTCS paperwork directly to BPA, the last day for submission is **September 11, 2023**.

Due to BPA changes, beginning **September 1, 2023** the only HVAC jobs eligible for Inland Power rebates will be conversions from electric forced air furnaces to air source heat pumps or variable speed heat pumps, ductless heat pump conversions. Heat pump upgrades will no longer qualify for a rebate except for variable speed heat pumps. Heat pumps upgraded or added to fuel sources such as oil, gas or propane will no longer be eligible for Inland Power rebates.

All applications submitted to Inland Power after August 31, 2023, must include the following documentation:

- A fully completed Inland Power application.
- A contractor invoice, which includes make, model, price and date of purchase.
- The AHRI certificate

Please note that beginning **September 1, 2023**, Northwest HVAC Association will begin management of Inland Power's preferred contractor network for ducted and ductless heat pump systems. All contractors will be evaluated and vetted through the Northwest HVAC Association. For further details on how to be included in their certified technician list, please visit their website at inwhvac.org or call (509) 747-8810.

We appreciate your support to provide our Inland Power members with quality products and services, and wish your organization continued success. Please feel free to email us at conservation@inlandpower.com if you have additional questions.

Sincerely,

Haley Burk
Energy Services Specialist
Inland Power & Light
